The screenshot shows the Cisco Packet Tracer interface. The central workspace displays a network topology with a central Hub-PT (Hub0) connected to three PC-PT devices (PC0, PC1, and PC2). A Server-PT (Server0) is also connected to Hub0. The left sidebar shows the configuration for the selected device, Hub0, with the 'Out Layers' section expanded, showing Layer 1: Port(s): FastEthernet1, FastEthernet2. The right sidebar shows the 'Simulation Panel' with an 'Event List' table.

The screenshot displays the Cisco Packet Tracer interface. On the left, a network topology is visible, featuring a central router connected to various IoT devices, including a light bulb, a server, a fan, and a door. The main window shows the configuration for the 'IoT Server - Devices' tab. The configuration is organized into sections for different devices:

- IoT3 (PTT0810OITK-)**: Ceiling Fan. Status: Off | Low | **High**.
- IoT1 (PTT0810JH39-)**: Light. Status: Off | Dim | **On**.
- IoT5 (PTT0810OGT8-)**: Door. Open: **On** (indicated by a red dot). Lock: Unlock | **Lock**.
- IoT0 (PTT081074N8-)**: AC. Status: **On**.

The bottom status bar shows the time as 00:26:19 and includes icons for various network components and a power button.
